COTO

PRODUCTS FOR YOUR PROJECT

Remote control, load measurement and operation management.

CRC

Industrial radio remote controls

Models with 4, 6, 8 or 10 buttons; single or dual speed. Configurations for tandem, master/slave and operator transfer.

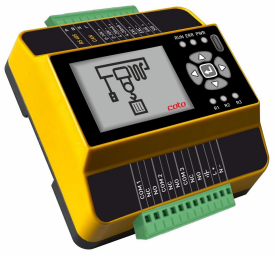

CLL

Overload control

Load monitoring with pre-alarm and alarm. Tare, calibration and configuration via COTO COLM on compatible versions.

CLB BLACKBOX

Operational control and logging

Two load cell inputs, four relays and Modbus integration. Logging of overloads, cycles and inverter data.

CWL

Wire rope load cell

Mounted on the wire rope. Alloy steel or stainless steel options; mV/V, 4–20 mA, 0–10 V and Modbus RTU outputs depending on the version.

CLP

Load pin

Pin-type load measurement. Dimensions and capacities to suit the application, with analog and digital signal options.

CED

External load indicator

Six-digit LED display with 3- or 4-inch characters. RS232/RS485 communication; integrated control depending on the version.

CAS | ROPE ANGLE

X/Y axis monitoring, pre-alarm and angle limit.
Integration with CLL, CLB or CED; Modbus and relay options.

Other solutions: CWS (wind), CTS (rotary), cross limit switches and anti-collision sensors.

Features, interfaces and functions depend on the model and project configuration.

COTO COLM: calibration, configuration, load monitoring and reporting on compatible devices. COTO SCM system: Smart Crane Management.
